

Kindergarten Registration 2018–2019 Health Information

In order to help streamline the registration process for your child to start kindergarten, we'd like to request receiving these health forms by May 1, 2018, if at all possible. Please note that Iowa Law requires a parent to provide evidence of the required immunizations upon enrollment. If your child is missing any of the required immunizations, your child may be enrolled provisionally for 60 calendar days if she/he has received at least one dose of each required vaccine. After the 60 days, your child will be excluded from school until they receive the immunizations. Please bring the completed forms to your child's school or the District Administration Office. If you have any questions, please contact your School Nurse or Sandy Walters (515) 457-5011 walterss@urbandaleschools.com.

Our request when printing/submitting forms: please print 1-sided (each form on its own sheet of paper). Also, if you bring original documents, we will copy and return the originals to you. Thank you!

- **Physical Exam:** Regular physical exams are recommended. Please provide a copy of your child's most recent physical using either the physical form included in this packet or the one used by your physician's office.
- **Blood Lead Test:** A Blood Lead Test is required by Iowa law prior to age 6 and before enrolling in an elementary school. Please request your physician provide you with a copy of the lab report. This test is often done routinely around age 1.
- **Dental Screening Certificate:** A Dental Screening should be obtained between the ages of 3 and 6 and is required by Iowa law. Please have your dentist complete the dental screening certificate included in this packet. The following are also permitted to complete the dental screening and certificate: MD/DO, PA, RDH, RN/ARNP.
- **Vision Card:** A Vision Screening is required. Please return the Vision Card included in this packet.
- **Student Health Index:** Please complete the form included in this packet as it will help us learn about any health concerns for your child.
- **Immunization Certificate:** This certificate can be obtained at your physician's office or you're welcome to use the form included in this packet. Please submit the immunizations that have been completed to date no later than May 1st, even if your child does not yet have the 4-year-old immunizations.

Kindergarten Welcome From Urbandale District Nurses

Dear Parent/Guardian:

Welcome to Kindergarten! As district nurses we are here to partner with you to promote the health and safety of your children. Enclosed in is a checklist for your convenience and the required paper copies of health records for your child. Please return any completed documents to the nurse at your school by **May 1st**.

Please note that Iowa Law requires a parent to provide **evidence of the required immunizations upon enrollment**. If your child is missing any of the required immunizations, your child may be enrolled provisionally for 60 calendar days if they have received at least one dose of each required vaccine. **After the 60 days, your child will be excluded from school until they receive the immunizations.**

In addition, please contact your school nurse (see contact information below) to provide any health needs or concerns that your child may have. These may include medications, asthma, diabetes, severe allergies, seizures, special dietary needs, or any other concerns that may affect your child while they are in our care at school. We want to make your child's school experience as healthy and safe as possible!

We look forward to partnering with you and your child!

Iowa Department of Public Health CERTIFICATE OF DENTAL SCREENING

**This certificate is not valid unless all fields are complete.
RETURN COMPLETED FORM TO CHILD'S SCHOOL.**

Student Information (please print)

Student Last Name:	Student First Name:	Birth Date (M/D/YYYY):
Parent or Guardian Name:		Telephone (home or mobile):
Street Address:	City:	County:
Name of Elementary or High School:	Grade Level:	Gender: <input type="checkbox"/> Male <input type="checkbox"/> Female

Screening Information (health care provider must complete this section)

Date of Dental Screening: _____

Treatment Needs (check ONE only based on screening results, prior to treatment services provided):

- No Obvious Problems** – the child’s hard and soft tissues appear to be visually healthy and there is no apparent reason for the child to be seen before the next routine dental checkup.
- Requires Dental Care** – tooth decay¹ or a white spot lesion² is suspected in one or more teeth, or gum infection³ is suspected.
- Requires Urgent Dental Care** – obvious tooth decay¹ is present in one or more teeth, there is evidence of injury or severe infection, or the child is experiencing pain.

¹ Tooth decay: A visible cavity or hole in a tooth with brown or black coloration, or a retained root.

² White spot lesion: A demineralized area of a tooth, usually appearing as a chalky, white spot or white line near the gumline. A white spot lesion is considered an early indicator of tooth decay, especially in primary (baby) teeth.

³ Gum infection: Gum (gingival) tissue is red, bleeding, or swollen.

Screening Provider (check ONE only):

DDS/DMD RDH MD/DO PA RN/ARNP (High school screen must be provided by DDS/DMD or RDH)

Provider Name: (please print) _____ Phone: _____

Provider Business Address: _____

Signature and Credentials
of Provider or Recorder*: _____ Date: _____

*Recorder: An authorized provider (DDS/DMD, RDH, MD/DO, PA, or RN/ARNP) may transfer information onto this form from another health document. The other health document should be attached to this form.

A screening does not replace an exam by a dentist.
Children should have a complete examination by a dentist at least once a year.

RETURN COMPLETED FORM TO CHILD'S SCHOOL.

A designee of the local board of health or Iowa Department of Public Health may review this certificate for survey purposes.

STUDENT VISION CARD

Student First/Last Name _____ Exam Date _____

Student Date of Birth ____/____/____ Student Home Zip Code _____

TO THE PARENT OR GUARDIAN: To fully assess the health of your child's visual system and prevent future learning problems associated with undetected vision problems, regular professional eye exams are essential. Experts estimate that 80% of learning is obtained through vision. Good vision directly contributes to a child's ability to learn while in school. As a part of your back-to-school preparations, it is recommended that you take your child and this card to your family eye doctor for a complete eye health examination. **This card should be signed by the eye care professional and returned to the school nurse or teacher by your child.**

The following organizations recommend the use of the Student Vision Card

To order more cards call 1-800-444-1772 • www.iowaoptometry.org

IMMUNIZATION REQUIREMENTS

Applicants enrolled or attempting to enroll shall have received the following vaccines in accordance with the doses and age requirements listed below. If, at any time, the age of the child is between the listed ages, the child must have received the number of doses in the "Total Doses Required" column.

Institution	Age	Vaccine	Total Doses Required
Licensed Child Care Center	Less than 4 months of age	This is not a recommended administration schedule, but contains the minimum requirements for participation in licensed child care. Routine vaccination begins at 2 months of age.	
	4 months through 5 months of age	Diphtheria/Tetanus/Pertussis	1 dose
		Polio	1 dose
		<i>haemophilus influenzae</i> type B	1 dose
		Pneumococcal	1 dose
	6 months through 11 months of age	Diphtheria/Tetanus/Pertussis	2 doses
		Polio	2 doses
		<i>haemophilus influenzae</i> type B	2 doses
		Pneumococcal	2 doses
	12 months through 18 months of age	Diphtheria/Tetanus/Pertussis	3 doses
		Polio	2 doses
		<i>haemophilus influenzae</i> type B	2 doses; or 1 dose received when the applicant is 15 months of age or older.
		Pneumococcal	3 doses if the applicant received 1 or 2 doses before 12 months of age; or 2 doses if the applicant has not received any previous doses or has received 1 dose on or after 12 months of age.
	19 months through 23 months of age	Diphtheria/Tetanus/Pertussis	4 doses
		Polio	3 doses
		<i>haemophilus influenzae</i> type B	3 doses, with the final dose in the series received on or after 12 months of age, or 1 dose received when the applicant is 15 months of age or older.
		Pneumococcal	4 doses; or 3 doses if the applicant received 1 or 2 doses before 12 months of age; or 2 doses if the applicant has not received any previous doses or has received 1 dose on or after 12 months of age.
		Measles/Rubella ¹	1 dose of measles/rubella-containing vaccine received on or after 12 months of age; or the applicant demonstrates a positive antibody test for measles and rubella from a U.S. laboratory.
		Varicella	1 dose received on or after 12 months of age if the applicant was born on or after September 15, 1997, unless the applicant has had a reliable history of natural disease.
	24 months and older	Diphtheria/Tetanus/Pertussis	4 doses
Polio		3 doses	
<i>haemophilus influenzae</i> type B		3 doses, with the final dose in the series received on or after 12 months of age; or 1 dose received when the applicant is 15 months of age or older. Hib vaccine is not indicated for persons 60 months of age or older.	
Pneumococcal		4 doses if the applicant received 3 doses before 12 months of age; or 3 doses if the applicant received 2 doses before 12 months of age; or 2 doses if the applicant received 1 dose before 12 months of age or received 1 dose between 12 and 23 months of age; or 1 dose if no doses had been received prior to 24 months of age. Pneumococcal vaccine is not indicated for persons 60 months of age or older.	
Measles/Rubella ¹		1 dose of measles/rubella-containing vaccine received on or after 12 months of age; or the applicant demonstrates a positive antibody test for measles and rubella from a U.S. laboratory.	
Varicella		1 dose received on or after 12 months of age if the applicant was born on or after September 15, 1997, unless the applicant has had a reliable history of natural disease.	
Elementary or Secondary School (K-12)	4 years of age and older	Diphtheria/Tetanus/Pertussis ^{4, 5}	3 doses, with at least 1 dose of diphtheria/tetanus/pertussis-containing vaccine received on or after 4 years of age if the applicant was born on or before September 15, 2000 ² ; or 4 doses, with at least 1 dose of diphtheria/tetanus/pertussis-containing vaccine received on or after 4 years of age if the applicant was born after September 15, 2000, but before September 15, 2003 ² ; or 5 doses with at least 1 dose of diphtheria/tetanus/pertussis-containing vaccine received on or after 4 years of age if the applicant was born on or after September 15, 2003 ^{2, 3} ; and 1 time dose of tetanus/ diphtheria/acellular pertussis-containing vaccine (Tdap) for applicants in grades 7 and above, if born on or after September 15, 2000; regardless of the interval since the last tetanus/diphtheria containing vaccine.
		Polio ⁷	3 doses, with at least 1 dose received on or after 4 years of age if the applicant was born on or before September 15, 2003; or 4 doses, with at least 1 dose received on or after 4 years of age if the applicant was born after September 15, 2003. ⁶
		Measles/Rubella ¹	2 doses of measles/rubella-containing vaccine; the first dose shall have been received on or after 12 months of age; the second dose shall have been received no less than 28 days after the first dose; or the applicant demonstrates a positive antibody test for measles and rubella from a U.S. laboratory.
		Hepatitis B	3 doses if the applicant was born on or after July 1, 1994.
		Varicella	1 dose received on or after 12 months of age if the applicant was born on or after September 15, 1997, but born before September 15, 2003, unless the applicant has had a reliable history of natural disease; or 2 doses received on or after 12 months of age if the applicant was born on or after September 15, 2003, unless the applicant has a reliable history of natural disease. ⁸

¹ Mumps vaccine may be included in measles/rubella-containing vaccine.

² DTaP is not indicated for persons 7 years of age or older, therefore, a tetanus-and diphtheria-containing vaccine should be used.

³ The 5th dose of DTaP is not necessary if the 4th dose was administered on or after 4 years of age.

⁴ Applicants 7 through 18 years of age who received their 1st dose of diphtheria/tetanus/pertussis-containing vaccine before 12 months of age should receive a total of 4 doses, with one of those doses administered on or after 4 years of age.

⁵ Applicants 7 through 18 years of age who received their 1st dose of diphtheria/tetanus/pertussis-containing vaccine at 12 months of age or older should receive a total of 3 doses, with one of those doses administered on or after 4 years of age.

⁶ If an applicant received an all-inactivated poliovirus (IPV) or all-oral poliovirus (OPV) series, a 4th dose is not necessary if the 3rd dose was administered on or after 4 years of age.

⁷ If both OPV and IPV were administered as part of the series, a total of 4 doses are required, regardless of the applicant's current age.

⁸ Administer 2 doses of varicella vaccine, at least 3 months apart, to applicants less than 13 years of age. Do not repeat the 2nd dose if administered 28 days or greater from the 1st dose. Administer 2 doses of varicella vaccine to applicants 13 years of age or older at least 4 weeks apart. The minimum interval between the 1st and 2nd dose of varicella for an applicant 13 years of age or older is 28 days.

Immunization Clinics
